

Bees Moving ST — Mover's Guide

Simple steps to make your move faster, safer, and more affordable.

This guide is based on real moving experience. Following these recommendations helps save time, avoid delays, and keep your moving cost under control.

■ Pack everything in boxes

All small and loose items should be packed in boxes to keep the move organized.

■ Arrange parking close to the entrance

Shorter distance saves time and reduces moving cost.

■ Do not overload boxes

Heavy boxes require two movers instead of one and slow the process.

■ Disassemble furniture in advance

Beds, frames, and large furniture should be disassembled when possible.

■ Empty all furniture

Dressers, cabinets, and wardrobes must be completely empty.

■ Clear all pathways

Hallways, staircases, and doorways should be free of obstacles.

■ Secure pets and children

For safety reasons, keep pets and children in a separate area.

■ Share accurate information in advance

A short video or detailed description helps us plan correctly.

Good preparation saves time, reduces stress, and ensures a smooth move.
